

## Adding Reference to RefWorks Using Save to RefWorks PubMed Example

1. Adding References to RefWorks using the Save to RefWorks tool.
2. To get to the Save to RefWorks tool, click on the “More” button.
3. From the drop down menu, select the Tools option.
4. Click on the “Install Save to RefWorks” button.
5. Drag the Save to RefWorks bookmarklet to the favorite bar.
6. [no narration]
7. [no narration]
8. Here we have some results from a PubMed Search that we would like to put into RefWorks. Click on the Save to Refworks bookmarklet.
9. A side pane will appear with the articles on the page listed. To select an article, click on the box to the left of the article title.
10. [no narration]
11. [no narration]
12. To select all of the articles, click on the box to the left of “Select all.”
13. When you have selected all of the articles you want, click on the Save to RefWorks button.
14. To look at your citations, click on the View in RefWorks bar.
- 15.
16. As you look you will notice that one of the citations has a yellow triangle with an exclamation mark. This is telling us that there is information missing in the citation. To check this out, click on the yellow triangle.
17. The problem is that there is no issue number in the issue field.
18. To fix the issue, find the issue number and enter it in the field.
19. When you finish, click on “Save.”
20. [no narration]
21. [no narration]
22. [no narration]
23. [no narration]
24. As you can see, this removes the error message.
