Please see the section titled Other Campbell Libraries for details.

OneSearch
OneSearch is a discovery tool that allows faculty and students to search the library's many resources from a single search box. OneSearch indexes the library's catalog of books and e-books, the vast majority of full-text journal articles and other e-resources, and the library's media collection. As users search in OneSearch, they can narrow results by using facets such as subject, date, material type, and peer-review status. For many research needs, OneSearch is the most efficient way to locate large numbers of books and articles. Please note that most of the library's abstract-only products (PubMed, ATLA, etc.) are not indexed in OneSearch, but can be accessed from the Databases tab on the library home page. Library instruction sessions in
CUFS 100, ENGL 101, and many other courses focus on the use of OneSearch as a retrieval tool. OneSearch is the default search option on the library home page at http://library.campbell.edu.

**Online Catalog**

The online catalog includes materials in the main collection as well as items located in the Law Library and the Medical Library. You may access CamelCat online by selecting the “Books & Media” tab on the library’s homepage at http://library.campbell.edu.

Each student and faculty has a library account. To access your library account, click on “Renew Materials” under Quick Links on the library’s homepage. By logging in to your library account, you are able to see the items that you currently have checked out, renew your materials, or put holds on checked out items.
