Periodicals Reading Room (Wiggins Library)

What was the biggest stumbling block in your research?

I had to research several different academic disciplines so the biggest stumbling block was making sure I covered the key scholars in all the diverse areas.

What excites you most about your research?

The opportunity to work with colleagues from across the state and nation to build collaboration.

What inspired you to approach research in the way you have?

I'm impressed with 1) how many things bacteria are able to do, and 2) how much student researchers contribute. Both inspired me to stay curious and ask questions.
